HM SERIES
MOISTURE SEPARATOR

SEPARATES MOISTURE / FILTERS LARGE AIRBORNE PARTICULATE AND COOLANT MIST

HM SERIES
MOISTURE SEPARATOR
SEPARATES MOISTURE / FILTERS LARGE AIRBORNE PARTICULATE AND COOLANT MIST

AVAILABLE IN TWO ALLOYS

HMG
Galvanized Steel

HMS
Stainless Steel

Application: The HM Series Moisture Separator is an impingement type panel filter that serves two important functions: its primary purpose is to collect large water droplets and oil mist from the airstream and divert the liquid to an appropriate drain; its secondary function is as a washable particulate filter. The HM Series is built for use in outside air ducts, side-access housings and built-up filter banks. Other applications include chilled water coils and mist-type humidifiers. The HM Series is designed for higher airflow velocities. It performs best in a system running at no more than 10% above or below its rated velocity of 500 fpm.

Construction: The HM Series uses a 24-gauge metal frame to enclose the media pack consisting of multiple layers of corrugated and flat screen wire positioned for efficient drainage. The pack is then placed between two layers of expanded metal, and is made to fit firmly inside the frame giving the HM Series filter exceptional strength and durability. The bottom of the filter as 3/8” diameter drain holes and the top is identified with proper positioning for drainage and airflow. The frame is made with mitered corners and is secured with pop-rivet(s).

Filter Cleaning and Coating:
1. To clean a dirty filter, rinse it with a moderate-to-heavy stream of warm water. High-powered steam cleaning or chemical dips are unnecessary and not recommended.
2. The HE Series filter is not supplied from the factory with filter adhesive coating. If desired, it may be sprayed before installation with Filter Coat, a water soluble adhesive and detergent. AMFCO does not sell Filter Coat nor any adhesive.

PRODUCT HIGHLIGHTS
- Rigid, 24 Gauge Metal Construction
- Corrosion Resistant
- Washable and Reusable
- Available with Side Gaskets
- Corner Drain Holes

FAST FACTS

MINIMUM ORDER:
No Minimum Order

SIZING OPTIONS:
Standard and Special Sizes Available
(See reverse side for details.)

CLASSIFICATION:
UL Classified 900

MAX TEMP:
HMG – 325 Degrees F
HMS – 900 Degrees F

Due to continuing research and development, we reserve the right to make modifications to any product.

### HM SERIES NOTES

**SIZING INFORMATION**
- What does Nominal mean? Standard size filters are of a nominal dimension. This means the height and width dimensions are undercut by a certain amount. See below for the exact amount of undercut for each dimension.
- **Filter Thickness**: Nominal 1” (actual 7/8”), nominal 2” (actual 1-3/4”) and nominal 4” (actual 3-3/4”).
  1. **Standard** nominal filters are 5/8” undercut on the height and width dimensions.
  2. **Special** size filters are made to the exact height and width dimensions provided.
  3. **Standard and Special** size filters are available in nominal 1” (7/8” actual), nominal 2” (Actual 1-3/4”) and nominal 4” (3-3/4”).
  4. Tolerance height and width: ± 1/8”
  5. Tolerance thickness: ± 1/32”

**CLASSIFICATION AND TEST NOTES**
- UL Classified 900
- Rated Airflow: 500 fpm
- Recommended Airflow Range: 450 – 550 fpm.
- Dust Holding Capacity:
  - a. 2” thick: 51 grams per square foot
- Average Arrestance:
  - a. 2” thick: 64% at rated airflow
- Recommended final resistance is .50” W.G.
- Independent test report available for performance details

### OPTIONS
- The HM Series may be supplied with polyurethane gaskets on the vertical sides of the frame for use in side access housings. Specify “with gaskets” when ordering.

### INSTALLATION CONSIDERATIONS
- The HM Series filter, when used to separate moisture, must be installed in HVAC systems with the TOP label facing upward to allow for proper drainage.
- When purchasing special size HM Series filters, specify if the drain holes should be on the short or long dimension of the frame.

### ADDITIONAL INFORMATION
- The nominal 1” (actual 7/8”) filter is 9-ply.
- The nominal 2” (actual 1-3/4”) filter is 15-ply.
- The nominal 4” (actual 3-3/4”) filter is 15-ply.
